Personal Profile

Last year, alongside full-time work, I began studying at FreeCodeCamp and edX, where I developed an interest in coding.

I recently completed a Skills Bootcamp for software development at JustIT in London.

During this bootcamp, I gained proficiency in the fundamentals of HTML, CSS, JavaScript, MySQL, and Python.

Currently, I am working on building my portfolio by creating personal projects.

I am actively seeking junior developer opportunities to further enhance my skills and gain experience within the tech industry.

With my 15 years of experience as a professional chef, I am prepared to transfer my organisational skills.

I possess a strong ability to handle multiple tasks, a dedicated work ethic, and a keen attention to detail.

Education and IT Training

May-August 2023

Just IT Training Ltd, London

Digital Skills Bootcamp: Software Development

A twelve week intensive bootcamp covering the fundamentals of Web and Software development.

2002-2003

Core Modules:

Languages:

FreeCodeCamp, edX

Loops, Lists, Tuples, Strings, if Statements

Python, HTML, CSS, JavaScript

2005-2007

La Chef Levi, Thessaloniki

Culinary school with specification on cooking art. No2024

IT Skills

Software Development Skills: Python and MySQL

Web Technology: HTML5, CSS3, JavaScript and React framework

Core Programming Languages: JavaScript and Python

Projects:

- I am building a full stack “barista journal” web application, as a personal project, using React framework with AWS Amplify studio (https://github.com/Kos-devUK/react_app).
- I’ve created a click game with a scoreboard, based on the knowledge I gained at the bootcamp. I used HTML, CSS and Javascript.
- Created a website for a board game’s cafe with a library search bar and a survey form for customer’s preference on board games. The languages were used are HTML, CSS and Javascript.
- A database project (C.R.U.D.) for a board games store library. Is written in Python and launched on replit.com, part of my python project for the bootcamp.
- As a part of the database assignment I’ve created a six table database for a breakdown car company, written in mySQL.

Employment History

2005 - 2023

Chef, Various Restaurants and Hotels

United Kingdom: January 2023 Poon's Wontoneria , April 2021 Prufrock

The Netherlands (2010 - 2020): Kleine Parade, Metro City Kitchen, De Markt

Greece (2005 - 2010): Yamas, Ta Nisia

- As a chef, I was responsible for organising the food stock and daily deliveries. This helped me to develop my organisation skills and proactivity.
- Guiding and training the young and freelance chefs helped me to create great communication skills.
- Working efficiently under pressure was essential to learn time management.
- Monitoring all the hygiene standards and the safety regulations was important to Improve attention to detail.
- Providing recipes for specials and seasonal dishes was a great chance to stay creative.

Interests and Achievements

I am practicing the fundamental skills I learned at Code Wars, HackerRank and LeetCode.

I am learning and practicing Game Maker, a game engine specialising in 2d game creation.

I am currently learning the fundamentals of GOlang at FreeCodeCamp.

Hobbies:

- Audio designing and mixing with Ableton Live, a DAW. I've created some experimental projects.
- Standard use of Krita, an open-source graphic editor.
- Video games and board games.
- Learning different languages. Dutch full professional proficiency, as I was dutch citizen for 10years.
- Road biking. Cycling long distances, once achieved 65miles.
